PROFESSIONAL SUMMARY

Experienced Angular Frontend Developer having 4.6+ years of practical exposure in developing robust enterprise applications with Angular (v8 to v20, incl. standalone components), TypeScript, RxJS, and NgRx. Experienced in designing component libraries with Angular Material, integrating REST API's, and improving performance by implementing lazy loading/code splitting features for applications with 5,000+ active users per day.

CORE TECHNICAL SKILLS

Frontend Frameworks: Angular (v8-20, standalone components)

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

UI Libraries: Angular Material, Bootstrap, SASS/SCSS, Responsive Web Design

Tooling & Practices: Git/GitHub, REST APIs, Webpack, NPM, Agile/Scrum Methodologies

Familiar With: Node.js (6 months), .NET (basic), Database Design

AI Tools: GitHub Copilot, Claude AI, ChatGPT

PROFESSIONAL EXPERIENCE

Software Engineer (Permanent) — Tenarai (formerly Infogain), Noida *Jul 2022 – Aug 2026*

- Design and implement more than 6 Angular modules for enterprise-scale apps with increased page load speed using lazy loading and code splitting..
- Architect reusable Angular UI components using Angular Material and SCSS, streamlining development workflow across 2-3 project teams.
- Integrate RESTful APIs and manage application state using NgRx/RxJS, improving data consistency across real-time data flows.
- Collaborate with backend and UX teams in Agile sprints to deliver responsive, pixel-perfect interfaces aligned with Figma/XD design specs.
- Participate in code reviews and support SQL query optimization for analytics dashboards, contributing to a team of 6+ developers and mentor junior developers on Angular lifecycle and performance.
-

Frontend Developer (Contract) — Infogain India, Noida *Jan 2022 – Jul 2022*

- Developed and maintained Angular-based enterprise modules with a focus on performance optimization using lazy loading and code splitting.
- Built reusable UI components using Angular Material and SCSS to accelerate development across multiple project teams.

KEY PROJECTS

Interview & Offer Management Module — Angular, NgRx, Angular Material, REST APIs

- Developed an integrated solution to schedule interviews and manage offers with custom workflows and approvals at multiple levels for HR teams managing 500+ requisitions per month.
- Implemented role-based access control (RBAC) scoping permissions for HR managers, interviewers, and admins, reducing unauthorized data exposure incidents to zero.

Leave Management & Admin Control System — Angular, NgRx, Angular Material, REST APIs

- Created an admin dashboard to configure and approve leave policies for 5,000+ daily active users from different departments.
- Real-time leave analytics visualization that will allow HR leaders to take informed decision regarding their workforce.
- Delivered guidance to 3-4 junior developers for implementation of UI for leave managment sytem project enhancment using ui ux; created code review guidelines for maintaining code consistency and quality.

Reusable UI Component Library — Angular, TypeScript, SCSS, Storybook

- Created a library of 30+ production-ready Angular components (forms, tables, modals, charts) used in 3 internal projects, saving 30% of development time.

EDUCATION

Master of Computer Applications (MCA) — PIEM, Delhi, India (Dec 2016 – Jun 2019), 68.68%
