PROFESSIONAL SUMMARY

Angular Frontend Developer with 4.6 years of hands-on experience building scalable, enterprise-grade web applications using Angular (v8 to latest, including standalone components), TypeScript, RxJS, and NgRx. Proven track record architecting reusable Angular Material component libraries, integrating REST APIs, and optimizing performance through lazy loading and code-splitting for applications serving 5,000+ daily active users. Strong secondary experience in React.js (2 years) and working familiarity with Node.js. Immediate joiner, targeting 10-15 LPA Angular-focused roles.

CORE TECHNICAL SKILLS

Frontend Frameworks: Angular (v8-20, standalone components) — primary, 4.6 yrs | React.js — secondary, 2 yrs

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

State Management: RxJS, NgRx, Redux

UI Libraries: Angular Material, Material UI, Bootstrap, SASS/SCSS, Responsive Web Design

Tooling & Practices: Git/GitHub, REST APIs, Webpack, NPM, Agile/Scrum, WCAG Accessibility, Storybook

Familiar With: Node.js (6 months), .NET (basic), Database Design

AI Tools: GitHub Copilot, Claude AI, ChatGPT

PROFESSIONAL EXPERIENCE

Frontend Developer (Permanent) — Tenarai (formerly Infogain), Noida

Jul 2022 – Present

- Develop and maintain 6+ Angular modules for enterprise-grade applications, improving page load performance through lazy loading and code-splitting techniques.
- Architect reusable Angular UI components using Angular Material and SCSS, streamlining development workflow across 2-3 project teams.
- Integrate RESTful APIs and manage application state using NgRx/RxJS, improving data consistency across real-time data flows.
- Collaborate with backend and UX teams in Agile sprints to deliver responsive, pixel-perfect interfaces aligned with Figma/XD design specs.
- Apply TypeScript best practices across the codebase to reduce runtime errors; mentor junior developers on Angular lifecycle and performance.
- Participate in code reviews and support SQL query optimization for analytics dashboards, contributing to a team of 6+ developers.

Frontend Developer (Contract) — Infogain India, Noida

Jan 2022 – Jul 2022

- Developed and maintained Angular-based enterprise modules with a focus on performance optimization using lazy loading and code splitting.
- Built reusable UI components using Angular Material and SCSS to accelerate development across multiple project teams.

KEY PROJECTS

Interview & Offer Management Module — Angular, NgRx, Angular Material, REST APIs

- Built an end-to-end interview scheduling and offer management system with configurable workflows and multi-stage approvals for HR teams handling 500+ requisitions monthly.
- Implemented role-based access control (RBAC) scoping permissions for HR managers, interviewers, and admins, reducing unauthorized data exposure incidents to zero.

Leave Management & Admin Control System — Angular, NgRx, Angular Material, REST APIs

- Designed a centralized admin dashboard for leave policy configuration and approval workflows supporting 5,000+ daily active users across multiple departments.
- Integrated real-time data visualization for leave analytics, enabling HR leadership to make data-driven workforce decisions.
- Guided 3-4 junior developers on UI implementation; established code review standards that improved consistency and code quality.

Reusable UI Component Library — Angular, TypeScript, SCSS, Storybook

- Built a shared library of 30+ production-ready Angular components (forms, tables, modals, charts) adopted across 3 internal projects, cutting redundant development effort by ~40%.

EDUCATION

Master of Computer Applications (MCA) — PIEM, Delhi, India (Dec 2016 – Jun 2019), 68.68%
